RESEARCH INTERESTS

Recovery & Well-being; Leadership & Life Experiences; Social Perception & Career Development; Research Methods & Evidence Synthesis

SELECTED PUBLICATIONS

Liu, Z., Liang, Z., Wang, C., & Bian, W. (2024). **Being a Parent Helps Being a Benevolent Leader: A Mixed-Method Approach** *Journal of Business Ethics* 197(4), 761–784

Leadership development can draw on experiences beyond the workplace. This study examines how positive parenting experiences relate to benevolent leadership through the resources parents bring to their work roles.

Link

Liu, Z., Bian, W., & Bian, Y. (2024). **Leadership Blossoms in Parental Warmth: Positive Parenting Practices Shape Adolescent Leader Emergence via Intrapersonal and Interpersonal Mechanisms** *Journal of Youth and Adolescence* 53(10), 2266–2286

Leadership can begin to develop long before a formal work role. This study investigates the family as a setting for adolescent leader emergence, focusing on parental warmth and encouragement of independence.

Link

Chen, H., Zhang, X., & Bian, W.* (2024). **Using Machine Learning to Explore the Predictors of Life Satisfaction Trajectories in Older Adults** *Applied Psychology: Health and Well-being* 16(4), 2190–2203

Life satisfaction in later adulthood follows different paths over time. This study combines trajectory analysis and machine learning to identify those paths and the factors that help distinguish them.

Link

Ni, X., Zhu, X., Bian, W., Li, J., Pan, C., & Pan, C. (2024). **How Does Leader Career Calling Stimulate Employee Career Growth? The Role of Career Crafting and Supervisor–Subordinate Guanxi** *Leadership & Organization Development Journal* 45(1), 21–34

A leader's sense of calling may matter for employees' careers as well as the leader's own. This study examines career crafting as a link between leader career calling and employee career growth.

Link

Bian, W., Zhang, X., & Dong, Y. (2022). **Autonomic Nervous System Response Patterns of Test-Anxious Individuals to Evaluative Stress** *Frontiers in Psychology* 13

Evaluative situations can produce similar feelings of arousal but different physiological responses. This study examines how people with high versus low test anxiety respond to an interview-based stressor.
